

ESWELL Newsletter

January 2023

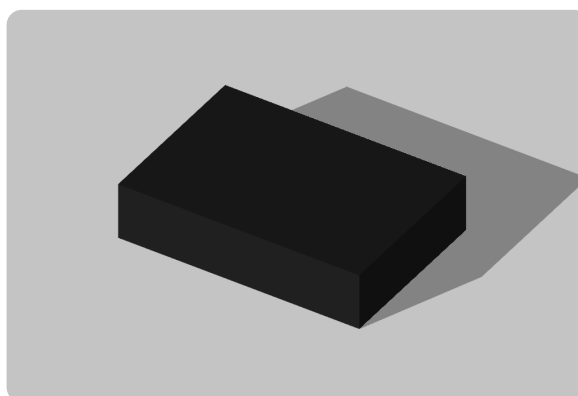

Dear ESWELL customer,

With this newsletter I want to inform you about the latest developments and news from our side and at the same time wish you a happy New Year.

New products

We have added a new positioning pad to our standard product range. Our new **Back pad "Hacks"** is designed to be placed under the upper back of patients that are difficult to intubate. It will be included in the next update of our brochure.

Item no.	Description	Colour	Size L x W x H in mm	List price in EUR
229544	Back pad "Hacks"	Black	345 x 240 x 80	321,10

ESWELL

Updated products

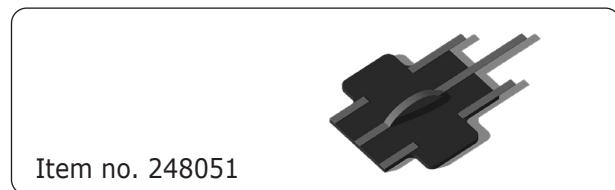

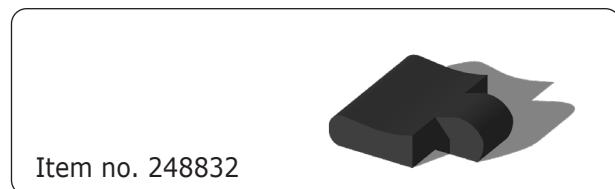

Our Heel pad single, short (item no. 248461) will be updated with the next production. In the future it will be 10 mm higher than the current version. Also the foam will be updated and in the future it will have a more stable 2-layer foam construction.

Price and item no. will stay the same.

Discontinued products

We are still working on optimizing our product range and the following products have been removed from our standard range and from the brochure in the next update:

We still have some of the discontinued products on stock and they will also be available in the future – you just must calculate with a longer delivery time.

Updated brochures

All our brochures will be updated soon and sent to you as soon as they are available in your language. They will also be available online on our website www.eswell.eu.

Delivery times in general

We are still experiencing a shortage in materials and longer delivery times from our sub-suppliers. The situation is still quite stable and we are currently working with 4 to 6 weeks production time. We hope that the situation will improve further over the next months.

International exhibitions

Currently, we are planning to participate (with local partners) at the following exhibitions/meetings in 2023:

- **NORDAF, Oslo, Norway, 28.04. - 29.04.**
- **FS OP temadag, Kolding, Denmark, 30.05.**
- **NORNA 2023, Bergen, Norway, 06.09. - 08.09.**

If you are planning to participate at a congress/exhibition/meeting in your country, where you think that the participation of ESWELL could make a difference, let me know. I can join you at the exhibition and take with me our pressure-imaging system to show how pressure changes when placing patients in different positions.
